

Vent-Bettina

	Safety cages available for low ceilings.
	Suitable for Damp Location
	
(A) Shown in Brushed Nickel with mahogany blades.	
(B) Shown in Polished Chrome with metal blades and safety cages.	

The Vent-Bettina rotational ceiling fan is thoughtfully designed with its arms gently upward curving. The fan offers fluid lines and quiet axial rotation. The motor heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotational is achieved by both motor head position and fan blade speed. The Bettina is available in these standard finishes: polished chrome, brushed nickel, polished copper, bronze and black. Other finishes are available as special orders.

- Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans.
- Constructed of cast aluminum, heavy spun and stamped steel, the Bettina carries a limited lifetime warranty.
- Each unique motor mount and fan head knob is made of genuine marbled Bakelite.
- The Bettina is available with the following blade options:
 - metal blades with decorative metal blade guards
 - solid, ecologically harvested mahogany blades without blade guards
 - metal blades with metal safety cages for use in low ceiling applications (7 ft in US / 8.2 ft in Canada).

Vent-Bettina

weight: 19 lbs
voltage: 110 or 220

The Vent-Bettina can be mounted with any one of the following down rod lengths: 5, 10, 20, 30, 48 or 72".

- The down rods can be easily field cut; they are not threaded.

The Vent-Bettina is compatible with flat or vaulted ceiling canopies.

All fans best regulated by variable speed wall controls.

Metal bladed fans with protective powder or clear coatings are suitable for Damp Location.

Safety cages available for low ceiling applications.
